

Schedule 3

Description of Platform

BiltOn, the leading construction operations & risk management software empowers Owners & General Contractors with innovative tools to help streamline site operations, optimize workforce & labor management, strengthen safety regulations, lower potential risks, and ensure compliance standards are met.

BiltOn unifies workforce, safety, risk, and compliance into a single, comprehensive software solution, helping save time and improve outcomes by automating manual processes. With key features including labor management, access control with facial verification, and real-time insights with progress documentation and tracking, Owners & General Contractors can efficiently streamline operations across every project.

BiltOn's robust set of features includes automated headcount with accurate time-in/out tracking, simplified pre-shifts, automated incident reporting, safety checklists & observations. Easily track certifications, permits, and worker credentials to enhance site safety, risk and compliance using a single software solution.

BiltOn provides a suite of solutions adaptable to any work environment, with capabilities like mobile & web access, offline mode with auto-save, custom reporting, real-time dashboard insights, SMS alerts, push notifications, and seamless API integrations, allowing for seamless communication and documentation, every step of the way.

We offer three types of packages to meet your needs:

Essential

Labor Management, Permits Tracking, Safety Checklists and Observations, Pre-Shifts and Incident Reports. Includes Real-Time Data Insights and Attendance Sheets

Standard

Labor Management, Permits Tracking, Safety Checklists and Observations, Pre-Shifts and Incident Reports, One (1) Access Control license (for Entrance and Exit), Includes Real-Time Data Insights and Attendance Sheets.

Pro

Labor Management, Permits Tracking, Safety Checklists and Observations, Pre-Shifts and Incident Reports, One (1) Access Control license (for Entrance and Exit), Includes Real-Time Data Insights and Attendance Sheets, Including API Integration

***Additional:** Daily Log - Fully Integrated With BiltOn's Software, Subcontractor Tracking, Progress Documentation.

With BiltOn, Owners & General Contractors can seamlessly replace manual processes with automated workflows that enhance operational efficiency, provide real-time site visibility, lower potential risks, and ensure compliance standards are met helping avoid litigation and regulatory fines.
